Continuation of 11. does NOT place the application in condition for allowance because: The arguments filed are not persuasive. Furthermore arguments regarding the marker held by a driver "only when the driver holds the qualified person marker opposite the marker detector" is taught by Berthiaume, since the driver has to hold the key 110 in order to place it in data port 120, and a qualified person (the qualified person being the person holding the key) is detected only when the key is held opposite data port 120. Applicant's argument regarding Roed's transceiver provided in a shoe and transponders placed on floor 1 and combining Roed with Berthiaume and that the combination is non-analogous art, it has been held that the determination that a reference is from nonanalogous art is twofold. First, we decide if the reference is within the field of the inventor's endeavor. If it is not, we proceed to determine whether the reference is reasonably pertinent to the particular problem with which the inventor was involved. In re wood, 202 USPQ 171, 174.
